Summary: The position of the EUS Clinical Applications Specialist (CAS) is part of the EMEA Product Marketing Team and reports to the Director, Endoscopic Ultrasound, Global/EMEA. The CAS is responsible for providing ultrasound expertise, clinical application knowledge and product support to facilitate sales and marketing efforts in the commercialization and sale of Endoscopic Ultrasound (EUS) products.

Main Responsibilities/Main Tasks

- Provide clinical application and product support in the field of Endoscopic Ultrasound (EUS) during marketing and sales processes
- Develop and deliver external (clinical professionals) and internal (sales teams) clinical application and product training
- Carry out product demonstrations and provide clinical applications support for EUS products at defined accounts, specifically to support key opinion leaders (KOLs), experts and advocates
- Keep up to date with ultrasound and endoscope product knowledge to maximize customer demonstration success and be able to provide effective advice on product performance, customize equipment to user needs
- Establish and maintain strong relationships with KOLs and key customers
- Lead in organizing and supporting live demonstrations during national and international congresses and training courses
- Support sales teams during national and international scientific congresses and exhibitions by performing product demonstration and customer training
- Provide regular input about product performance, competitors’ products and strategies, customer feedback, market trends and sales arguments

Qualifications

- Education
  - Must be qualified Medical Ultrasound Sonographer (or equivalent) with several years of ultrasound experience
  - Bachelor’s degree in Science, Business or related field preferred

- Skills and Expertise
  - Should have prior experience as working as Clinical Applications Specialist in an ultrasound company or recent experience of working in a clinical department
  - Experience of teaching in a clinical setting and confidence to present to groups of people
  - Self motivated and able to work independently with a focus on achieving the
objectives for the business
- Communication skills for regular information transfer and cross-functional teamwork in the organization
- Flexibility regarding extensive travel up to 75% across EMEA
- English and French language skills on professional level
