

Internship / Thesis

Full Time. On Site and From Home

About Us

Escentia is a German-based, multi-lingual, Clinical Affairs consultancy. We deliver regulatory and compliance solutions to the medical devices industry.

To meet the needs of our clients, our service offering is across four key areas: Clinical Evaluation, Process Development, Post Market Clinical Follow-Up and Clinical Strategy.

At Escentia, we value a friendly atmosphere. We like face-to-face communication, not everything needs to be put in writing. We plan projects with our customers with realistic timescales. Time can be the enemy of quality, quality comes first. We are one team and believe every role has an equal impact on our success. We work with people, not machines, so appreciate the need for a healthy work-life balance. We strive to create a working environment and working conditions that allow you to do your best, grow and enjoy working. We mentor people, we don't control them. Promotion here is based on talent, nothing else. We invest in you – your training and continuing professional development are very important to us.

About the Job

Learning everything there is about clinical evaluations.

You were always the one who enjoyed writing papers more than making things work in the lab or solving advanced math problems? You like working on big piles of data and find the one important information that helps you move on? You enjoy sharing your knowledge and take ownership for your projects?

You could be the next member of our amazing start-up team.

Key Tasks

- Support the experts in our team and learn from them
- Review clinical and pre-clinical data, bench tests and usability documentation

Requirements

- In the process of obtaining a medical, engineering or scientific degree
- Minimum 2/3 of your degree finished
- Language proficient in English and German
- Customer focused, solution oriented and independent
