

Are you looking for more than just a job? Something truly significant and worthwhile? Then Sysmex is the right place for you. Our products are needed. By people all over the world, for a healthy life.

If this appeals to you, come and join us in the position of

Engineer (f/m/x) as Technical Product Manager for Laboratory Analysers (Haematology)

Your responsibilities

- **Handle service requests** in the EMEA region (Europe, Middle East, Africa) as 2nd level support
- Analyse and solve technical problems, also on customer's site
- **Conduct technical training courses** for the technical support staff in EMEA
- Provide customer support for the application of instrument-specific software
- Take care of **escalation and complaint management** in cooperation with affiliates, our Japanese headquarters and suppliers
- Prepare and revise technical documentation

Your profile

- Degree in medical technology or comparable education
- Experience in technical support as well as in conceptualising and conducting training courses
- Profound expertise in electrical and medical engineering as well as IT basics
- Confident and professional appearance
- **Strong customer orientation** and the ability to motivate

Our offer

- A growing and healthy corporate group with **respect and trust as the basis for cooperation and communication**
- As family friendly company we support flexible working time, offer a care allowance for children as well as a parent-child room at our premises
- A family atmosphere as well as innovative working in an international environment
- 30 days annual holidays as well as Christmas and holiday bonus
- Capital-forming benefits and subsidy towards the company pension scheme
- Flexible working times/flexitime as well as the possibility of mobile working
- Subsidy towards the public transport "ProfiTicket", free parking for all employees
- Diverse range of sport courses in our own fitness studio and massages
- Canteen/free beverages/fruit

Did we spark your interest? Then we look forward to receiving your application with salary requirements and the earliest possible starting date.
